resumen / brief description >

our friend Pipilotti Rist called one day and told us that she was invited to fill a whole number of the swiss cultural magazine *DU* (you). she accepted under the condition that she could invite her closest friends to do so. so *calc* got 4 pages, one of them Pipi filled with what she thinks of us and our way of doing art, a doublepage we did with an imageweave like we did a lot these days and one showed an unsharp image of the grass outside the studiodoor with *what = calc* definitions from a lot of friends. the imageweave we did for this occasion was made out of the icons and other small images from our first website.
